### DETAILED ACTION

This application was filed 7/22/2004 and claims priority to PCT/EP03/00824 (1/27/2003) which claims priority to UK 020225.3 (1/25/2002) and UK 0229819.8 (12/20/2002). Claims 1-10 and 12-13 are before the Examiner.

#### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-10 and 12-13 are rejected under 35 U.S.C. 102(a) as being anticipated by WO 02/08224. WO teaches compounds such as

**Example 20. (R)-2-{4-[(Benzo[1,2,3]thiadiazol-5-ylmethyl)-amino]-piperidin-1-yl}-1-(6-methoxy-quinolin-4-yl)-ethanol, dioxalate**

That anticipates the instant claims.

*Double Patenting*

3. Claims 1-10 and 12-13 of this application conflict with claims 1, 2, and 11-19 of Application number 10/031844 (allowed 8/30/2005), claims 14-23, 25 and 26 of Application Number 10/333829 (allowed 6/2/2005) and claims 1-10, 13 and 16 of Application Number 10/466394. 37 CFR 1.78(b) provides that when two or more applications filed by the same applicant contain conflicting claims, elimination of such claims from all but one application may be required in the absence of good and sufficient reason for their retention during pendency in more than one application. Applicant is required to either cancel the conflicting claims from all but one application or maintain a clear line of demarcation between the applications. See MPEP § 822.

*Claim Rejections - 35 USC § 112*

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 1-10 and 12-13 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Specifically the specification enables compounds and use to treat bacterial infections in mammals wherein R4 is benzothiadiazole. R4 can be many different and varied things. However the only R4 that has been made or taught or

enabled by the instant specification is when R4 is benzothiadiazole. No other heterocyclic or carbocyclic rings have been suggested or enabled by the instant specification.
